

April 16, 2018

Dear Valued Customer,

Due to rising environmental, raw material, and shipping costs associated with the production & supply of tin stabilizers, it has become necessary that we implement a price increase of 10% on all tin stabilizer products.

Effective immediately, or as contract allows, prices on all tin stabilizer products shipped on or after May 1, 2018 will increase by 10%.

We regret that we have to pass along price increases to our customers, however the present environment dictates that we can no longer absorb these costs. We value your long-term business and are grateful for your support at this time.

Sincerely,

A handwritten signature in black ink that reads 'Peggy Schipper'. The signature is written in a cursive style and is placed on a light gray rectangular background.
